

Tech 7 Ltd.

Tech 7 provides design and manufacturing services for build-to-spec, build-to-print, and complete turnkey projects – from prototype through mass production.

We serve customers in high-tech industries, such as aviation, defense, electro-optical, semi-conductor, medical, and digital printing.

Tech 7 turnkey manufacturing services include product design and development, prototyping, machining, finishing, sub-assemblies, and total product assembly.

Tech 7 collaborates with customers and provides technical and logistical support throughout the product's lifecycle, from inception, through development, to final integration and serial manufacturing.

Tech 7 works to improve customer's products and minimize customer's costs through design enhancements, efficient manufacturing processes, and quality control.

Tech 7 can fabricate parts, components or complete products in quantities, from prototypes and small batches to high-volume production runs. Our expertise and capabilities in casting methods allows customers to achieve mass production at the lowest cost.

The driving force in the company is the experience and expertise of the company's two principals. CEO Adar Azancot has served as CEO of several leading Israeli manufacturing companies. CTO Yuval Mishli has managed R&D, engineering and operations in both established companies and startups.

The Tech 7 team includes highly skilled engineers, programmers, machine operators, assemblers and testers.

Machining capabilities include CNC turning, 3/4/5-axis CNC machining, as well as conventional lathe and milling machines. The company provides full product testing and quality assurance processes.

Tech 7 has AS9100D with ISO 9001:2015 certification.
